	Powdered Flavours & Essences
	Liquor
	Hybrid Seeds
	Cosmetics
	Powdered Cleaners
	Adhesives & Sealants
	Pesticides & Insecticides
	Grease & Lubricants
	Pet Foods & many more

The following information will help us to develop the ideal package for your product:

• **Contents of Package**

Complete description of product to determine product protection and compatibility characteristics that are required in the packaging.

• **Size of the Package**

Approximate net weight or volume of product to be packed or predetermined height and/or diameter of the package.

• **Required Shelf-life**

Shelf-life includes the length of time and the conditions through which your product passes from the time it is filled through distribution, plus the length of time the product remains on the retail shelf. A broad range of Can

construction is available that will meet the shelf-life requirements without overpacking. Our Packaging Development Centre can also evaluate the shelf-life of your product.

• **Label Requirements**

We can design and make the labels or make the packages with labels supplied by you.

• **Detailed Filling Requirement**

Provide details of current or proposed filling methods including the temperature at which the product is filled and other atmospheric modifications.

• **Closing Requirements**

Including any special requirements for can bottom.
