Corner board is a multi layered kraft paper formed in a rigid angle it is the most economical packaging material. Which has the characteristics of recycling and strength, the main use is strengthening packaging units (corrugated boxes). It is used as a packaging medium to protect edges/corners of products. By reinforcing on four corner of the corrugated boxes, it gives structural stability, increasing the stacking Strength of pallets, thereby enabling us to do the optimum utilization of container. It is also used to give structural strength when placed as corner posts inside the corrugated boxes.
